CONTENTS of Volume 26 1998

Volume 26 Nos. 1–2

Special Issue
Metacognition in teaching and learning

Guest Editor
Hope J. Hartman

Hartman, Hope J.: Metacognition in teaching and learning: An introduction 1–3

Artzt, Alice F. & Armour-Thomas, Eleanor: Mathematics teaching as problem solving: A framework for studying teacher metacognition underlying instructional practice in mathematics 5–25

Wolters, Christopher A. & Pintrich, Paul R.: Contextual differences in student motivation and self-regulated learning in mathematics, English, and social studies classrooms 27–47

Mayer, Richard E.: Cognitive, metacognitive, and motivational aspects of problem solving 49–63

Everson, Howard T. & Tobias, Sigmund: The ability to estimate knowledge and performance in college: A metacognitive analysis 65–79

Gourgey, Annette F.: Metacognition in basic skills instruction 81–96

Carrell, Patricia L., Gajdusek, Linda & Wise, Teresa : Metacognition and EFL/ESL reading 97–112

Schraw, Gregory: Promoting general metacognitive awareness 113–125

Sternberg, Robert J.: Metacognition, abilities, and developing expertise: What makes an expert student? 127–140

Instructions for Authors 141–144

Volume 26 Nos. 3–4

Special Issue
GTE: A Generic Knowledge Based Tutoring Engine

Guest Editor
Kris van Marcke

Goodyear, Peter: Introduction 145

Van Marcke, Kris: GTE: An epistemological approach to instructional modelling 147–191

Spector, J. Michael: The role of epistemology in instructional design 193–203

De Diana, Italo P.F. & Ladhani, Al-Noor: Relating GTE and knowledge-based Courseware Engineering: Some epistemological issues 205–225

Johnson, Robin & Sime, Julie-Ann: Authoring and GTE 227–242

Merrill, M. David & ID_2 Research Group: ID Expert™: A second generation Instructional Development System 243–262

Murray, Tom: Authoring instructional expertise in knowledge based tutors 263–280

Elen, Jan: Automating I.D.: The impact of theoretical knowledge bases and referent systems 281–297

Wasson, Barbara: Facilitating dynamic pedagogical decision making: PEPE and GTE 299–316

Vassileva, Julita: DCG + GTE: Dynamic Courseware Generation with teaching expertise 317–332

Van Marcke, Kris: Concluding remarks 333–336

Volume 26 No. 5

Van de Rijt, Bernadette A.M. & Van Luit, Johannes E.H.: Effectiveness of the Additional Early Mathematics program for teaching children early mathematics 337–358

Mason, Lucia: Sharing cognition to construct scientific knowledge in school context: The role of oral and written discourse 359–389

Stark, Robin, Renkl, Alexander, Gruber, Hans & Mandl, Heinz: Indeed, sometimes knowledge does not help: A replication study 391–407

Volume 26 No. 6

Tait, Kenneth: Replacing lectures with multimedia CBL: Student attitudes and reactions 409–438

Järvelä, Sanna: Socioemotional aspects of students' learning in a cognitive-apprenticeship environment 439–472

Ferrari, Michel, Bouffard, Thérèse & Rainville, Line: What makes a good writer? Differences in good and poor writers' self-regulation of writing 473–488

Guidelines for Authors 489–492
